

2010 TimberRidge

"Your Outdoor Journey Awaits"

Off Road Chassis / Rugged Design

- This system is designed with our rugged off road camp sites in mind, from the greater ground clearance, super lube hubs, heavy duty A-Frame, to the tough durable suspension system. Each chassis is designed per floorplan for strength and excellent handling for years to come.

Four Seasons Package

- This package was designed by our Arctic Dealers in the North but it works for all climates from Alberta, Canada to Oregon. Please ask a sales consultant to review the Four Seasons Package Flyer with you.

Off Road Clearance Lights / Hitch Light

- These firmly attached and sealed one piece designed lights will not allow moisture into the wall or the lens to pop off while traveling to your favorite backcountry camp site. The convenient front hitch light makes setting up at the camp site a breeze.

Rugged Truss Roof System / Rear Ladder

- One-piece rubber roof with full front to back trusses. This walk-on design allows for full water run-off and helps prevent excess snow build-up.

Roto-torqued Outdoor Tough Cabinetry

- Here at Outdoors RV we know what the roads are like out our backdoor – gravel, dirt, rough terrain. We take the time to screw together our cabinets using real wood not particle board and staples. Look and feel behind the face frames of our cabinets and you will not see any shortcuts taken in our construction.

56 Gallon Heated Enclosed Fresh Water Tank

-This feature extends not only your camping season but the time you spend in the outdoors. This tank is also located sub-floor freeing up valuable interior storage space.

Outdoors RV Slide-Out System

-This system has been utilized for over a decade. It is an electric rack and pinion slide-out system that makes for ease in operation and does not take up valuable storage space like the competition. Outdoors RV also provides secured exterior slide out seals to protect your investment.

*Prices, Materials, Design, and Specifications are subject to change without notice.

"Perfect Balance" Laminated Construction

- Laminated Construction with Block Foam Insulation – the 2010 TimberRidge utilizes the perfect balance of laminated construction and block foam insulation to produce the best insulated laminated wall product on the market today.

Beaufloor Outdoor Tough Flooring

- Outdoors RV knows how you are going to use your new RV, we've designed each TimberRidge with this extra durable material to help keep your RV new while you, your children or even your pets track in the rocks and dirt from that favorite lake. This rugged flooring even comes with a 2 Year 50 Below Zero Cold Cracking Warranty.

Interior Comfort Package

- Mortise and Tenon Solid Wood Raised Panel Overhead Cabinet Doors, Two Tone Day and Night Shades, Metal Full Extension Galley and Living Room Drawer Guides, Bath Skylight, Bathroom Glass Shower Enclosures, Porcelain Toilet, Kitchen Pot & Pan Drawer, Residential Height Countertops, 22" Deep Range, & a DVD/CD/MP3 Surround Sound System with 6 Speakers & Subwoofer make you feel right at home.

TimberRidge Storage/Lighting Design

- Whether you are outside or inside your new RV you will notice that Outdoors RV has gone the extra mile in both storage compartments and lighting – when out shopping for new RV's many consumers do not notice these features but after the sale while either loading the RV for the 1st trip or out in the 1st rain storm these thoughtful features become real necessities

TimberRidge Cabin Creature Comforts

- 30" wide entry doors, exterior shower, 110V/ DSI 17.8 gal/hr water heater, quick cool A/C, microwave, tinted safety glass windows, (optional) one step electric awning, up to 26" LCD TV's and the list goes on – please feel free to ask a sales consultant for the 2010 TimberRidge – the RV designed specifically with the Mountain Cabin in mind.
